SUMMARY

Salesforce and CRM Analytics engineer with 7+ years building analytics solutions for cross-functional teams — sales operations, opportunity management, quote-to-cash, marketing, and customer service. Strong command of the Salesforce platform, data management, data preparation, automation, SAQL, data modelling, and reporting. I deliver end-to-end analytics projects from discovery and KPI definition through development and deployment to production — turning complex data into dashboards. Now expanding into AI tools and use cases, and looking to join a GTM team as a Salesforce engineer to improve user productivity and system efficiency.

EXPERIENCE

Salesforce Engineer

Education First

05/2026 - Present Budapest, Hungary

Joined Education First's CRM Analytics team to help migrate reporting from Qlik Sense to Salesforce CRM Analytics, rebuilding the dashboards that Sales, Marketing, and Customer Service leaders users on. Own a growing portfolio spanning sales performance, efficiency, upsell, marketing/SEO, and exploration analytics plus data-quality fixes and KPI design that keep the new platform trusted.

- Hel the migration of core reporting from Qlik Sense to Salesforce CRM Analytics, ensuring dashboard continuity and accuracy for business users.
- Developed comprehensive dashboards for Sales Performance, Sales Efficiency, and Upsell, providing leaders with insights into output, productivity, and growth opportunities.
- Created marketing and SEO dashboards that integrated top-of-funnel and demand signals with downstream sales activity, extending analytics across the full sales funnel.
- Implemented new exploration tables to enable detailed data analysis, transforming static reports into interactive investigation tools.
- Designed and standardized KPI calculations to measure business effectiveness, aligning metrics with leadership's goals.
- Resolved data-quality issues and rebuilt data recipes and datasets to maintain accurate, reliable reporting during the platform transition.
- Collaborated with Sales, Marketing, and Service stakeholders to tailor CRMA solutions to reporting needs and drive platform adoption.

Salesforce GTM Engineer

Twilio

07/2022 - 04/2026 Bangalore, India

Joined Twilio's **GTM organization** as the dedicated CRM Analytics owner for the **Sales Operations team**, becoming the single analytics point-of-contact for AEs, sales leadership, and GTM stakeholders. Turned raw pipeline, funnel, CPQ, product-usage, and service data into decision-ready dashboards used daily across the full go-to-market motion — top-of-funnel through post-sale expansion.

- Built AE productivity dashboards (Account Insight Cards, Performance Trackers, Cross-Sell Views) that gave reps a single view of their book and freed up selling time.
- Shipped Sales Performance and Customer Service dashboards linking sales output to post-sale health across the full customer journey.
- Built lead funnel and funnel-velocity dashboards that exposed stage drop-off and stalled deals, helping Sales Ops rework at-risk opportunities.
- Delivered forecast, pipeline, and opportunity dashboards that replaced manual prep and gave leaders a real-time view for forecast calls.
- Launched "Unified CPQ Insights" (config + pricing in one view) — adopted team-wide and prioritized for release.
- Integrated Snowflake as a single source of truth for unified GTM reporting.
- Kept core GTM dashboards accurate through major org restructures via platform cleanup and field-deprecation projects.
- Built advanced SAQL drill-down dashboards that let AEs self-serve answers and cut down ad-hoc report requests.
- Drove analytics adoption org-wide by partnering with Sales Ops, Engineering, and GTM leaders to tie every dashboard to a real decision.

KEY ACHIEVEMENTS

Tweek Week Project - Unified CPQ Insights

Created a CPQ insights dashboard combining key config and pricing details in one view.

TRAINING & CERTIFICATION

CRM Analytics Training

Instructor Led - Einstein Analytics Training ANC101, ANC201 and ANC301

Developing a dedicated CRMA learning site with dashboards, lessons, and practical examples.

EDUCATION

Bachelor of Engineering - Computer Science

LNCT Group of College (RGPV)

08/2013 - 08/2017

Bhopal, Madhya Pradesh

- Note key learnings, experience and skills gained relevant to the job.

CGPA

7.47 / 10

EXPERIENCE

Salesforce CRM Analytics Consultant

Cognizant

📅 06/2022 - 08/2021 📍 Bangalore

I worked on CRM Analytics projects for enterprise clients, focusing on improving existing dashboards, enhancing UX, and optimising performance. I handled development responsibilities independently and supported teams with reporting, data preparation, and documentation.

- Redesigned and optimised CRM Analytics dashboards with improved usability, performance, and interactive components using SAQL, bindings, dataflows, recipes, and clean data modeling.
- Delivered clear analytics solutions by converting business requirements into scalable dashboard designs, supporting ad-hoc reporting, issue resolution, and documentation.
- Independently managed enhancements and fixes, ensuring smooth delivery while coordinating with teams for reporting improvements and reliable dataset performance.

Salesforce Engineer

Accenture

📅 03/2018 - 08/2021 📍 Bangalore, India

I worked on CRM Analytics for Consumer Goods (Trade Promotion Management) and Telecom, focusing on dashboards, packaged app analytics, and Sales Cloud reporting. I handled modules independently, contributed across the development lifecycle, and supported junior team members on CRMA.

- Built CRM Analytics dashboards for TPM packaged apps and Sales Cloud, including datasets, dataflows, SAQL, bindings, and dashboard JSON.
- Managed data preparation, modelling, validation, and optimisation, converting requirements into scalable analytics designs.
- Delivered features and fixes independently, supported UAT/documentation, and guided junior team members in CRMA.
